Additional info for wind statistic

Source data	MCP LT - MCP session (1) - [Neural Network] (3)
Data from	1/1/1994
Data to	1/1/2025
Measurement length	372.0 Months
Recovery rate	100.0 %
Effective measurement length	372.0 Months

Note

To get the most correct calculation results, wind statistics shall be calculated with the SAME model and model parameters, as currently chosen in calculation. For WAsP versions before 10.0, the model is unchanged, but thereafter more model changes affecting the wind statistic is seen. Likewise WAsP CFD should always use WAsP CFD calculated wind statistics.
